Company and Focus

Fluential is the leading provider of 2-way speech translation solutions that enable people who speak different languages to communicate.

Fluential's technology is mature and ready for field use today.

Fluential focuses on:

- Solving specific translation problems in well-defined domains.
- Translating with exceptionally high quality, accuracy and consistency.

Solutions

Fluential's 2-way speech translation solution, S-MINDS*, includes:

- Hardware suited to the task:
 - Light-weight (2lb) computers available.
 - Rugged, portable computers available.
 - Wireless audio devices available.
- A versatile user interface that enables hand-free and eyes-free operation.
- Dialog sets tailored to users' unique requirements.
- User training.
- Field support, including ongoing improvement of coverage and accuracy.

Fluential's systems:

- Are platform-independent; they run in the Windows XP operating system.
- Are speaker-independent, so they do not need to be 'trained' to the user's voice before use.
- Accept natural speech input, so memorization of phrases is not required.

* Speaking Multilingual Interactive Natural Dialog System
