

Executive Biographies

Farzad Ehsani, President and CEO

Farzad has an 18-year record of management, software development, and research at companies such as Motorola, NEC, and Digital Equipment Corporation. Prior to FluentiaL, he was the business and engineering head of Entropic's Application Group, which was sold to Microsoft for over \$90M. As FluentiaL's CEO, Farzad is responsible for defining and articulating the product vision, driving the market opportunity, and managing the day-to-day operations of the company. Holding several patents and having authored numerous papers on the technological advancements in his field, Farzad holds an M.S. degree in electrical engineering and a B.S. degree in computer science, both from MIT. He is fluent in three languages, with a working knowledge of four other languages.

Demitrios Master, VP of Engineering

Demitrios has 19 years of hardware and software product development experience. He has gone through the full product development life cycle on more than a dozen products in the areas of telephony, signal processing, communications, algorithm development and information mining. At FluentiaL, Demitrios has been an investigator for DARPA-funded speech translation research and co-principal investigator of a NIST-sponsored project to create a phrase thesaurus. He has filed a patent for his research in language processing and holds a B.S. in computer science from San Francisco State University.
